Biology Test : Chapter 15 STUDY GUIDE ANSWERS Flashcards ...

Fossils, selective breeding and homologous structures have provided scientists with evidence that support the theory of evolution. As they started to study fossils they realised that these were not identical but had similarities with existing organisms. This suggested that organisms changed over time. Selective breeding of domesticated animals ...

IB Biology Notes - 5.4 Evolution

More evidence for evolution is offered by comparative anatomy (see Figure 12-1). As Darwin pointed out, the forelimbs of such animals as humans, porpoises, bats, and other creatures are strikingly similar, even though the forelimbs are used for different purposes (that is, lifting, swimming, and flying, respectively). Darwin proposed that ...
