eConnect Programmer's Guide - PureLogic

Many of these XML standards are defined by XML Schemas. XML Schema is an XML-based (and more powerful) alternative to DTD. XML Schemas Support Data Types. One of the greatest strength of XML Schemas is the support for data types. It is easier to describe allowable document content; It is easier to validate the correctness of data; It is easier to define data facets (restrictions on data) It is ...

XML Schema Tutorial - W3Schools

Look at the XML file above in your browser: note.xml. Most browsers will display an XML document with color-coded elements. Often a plus (+) or minus sign (-) to the left of the elements can be clicked to expand or collapse the element structure. To view raw XML source, try to select "View Page Source" or "View Source" from the browser menu.

eConnect Programmer's Guide - ApnaGP

When you use eConnect for Microsoft Dynamics GP, you must include the taAnalyticsDistribution node in the XML document. In the taAnalyticsDistribution node, include the aaAssignedPercent element, and then set this element to a specific value. The aaAssignedPercent element determines the percentage that will be distributed to the specific dimension code that you supply in the XML document.

Description of a sample XML document to import Analytical ...

XML does not require a DTD. When you are experimenting with XML, or when you are working with small XML files, creating DTDs may be a waste of time. If you develop applications, wait until the specification is stable before you add a DTD. Otherwise, your software might stop working because of validation errors.

To integrate your application with Microsoft Dynamics GP, eConnect requires you to submit XML documents that describe Microsoft Dynamics GP documents and transactions. To ensure the documents can be consistently processed, eConnect supplies a collection of XML schema that define the XML documents eConnect accepts.

EConnect - Microsoft Dynamics GP Forum Community Forum

4. Use XML to transfer data. eConnect uses XML documents to move data into and out of Microsoft Dynamics GP. The XML documents are a text-based representation of back office data. An XML schema specifies the data that is included in each type of XML document. This allows eConnect to provide back office integration to any

eConnect Installation and Administration Guide

eConnect allows you to add XML nodes to its document schema. Custom XML nodes enable you to use custom data elements within an eConnect XML document. Use custom data elements to provide additional data or to trigger custom business logic. When eConnect processes an XML document, it maps the name of each XML node to a SQL stored procedure.

WSDL files often contain XML schemas that define the elements that appear in SOAP messages. When you import a WSDL file to register a web service, the imported WSDL file, and any XML schemas included in the WSDL, are added to a global cache of WSDL and XML schema documents.

Manage WSDL and XML schema documents - Oracle

XML programming in SMO is limited to providing XML data types, XML namespaces, and simple indexing on XML data type columns. Microsoft SQL Server provides native storage for XML document instances. XML schemas let you define complex XML data types, which can be used to validate XML documents to ensure data integrity.

Using XML Schemas - SQL Server | Microsoft Docs

I'm wondering if there is an easier way to generate the sample eConnect XML. In theory, eConnect Requester with the eConnect Outgoing Service can send certain XML documents to MSMQ, but that is a hassle to setup properly, and I don't know that all transaction types are supported by eConnect Requester--such RMAApplyType.
