Installing Packages¶. This section covers the basics of how to install Python packages.. It's important to note that the term "package" in this context is being used as a synonym for a distribution (i.e. a bundle of software to be installed), not to refer to the kind of package that you import in your Python source code (i.e. a container of modules).

Installing Packages — Python Packaging User Guide

We recommend using an user install, sending the --user flag to pip. pip installs packages for the local user and does not write to the system directories. Preferably, do not use sudo pip, as this combination can cause problems.. Pip accesses the Python Package Index, PyPI, which stores almost 200,000 projects and all previous releases of said projects.. Because the repository keeps previous ...
